

CONTENTS OF VOLUME 267

Number 1, September 1, 2003

Induction of irreducible modules from normal subgroups	1
Ziqun Lu	
Crystal bases and simple modules for Hecke algebra of type D_n	7
Jun Hu	
MV-modules	21
Antonio Di Nola, Paul Flondor, and Ioana Leuştean	
On Brauer's Second Main Theorem and characters in blocks with nilpotent coefficient extensions	41
Yun Fan and Yuanyang Zhou	
The Lasker–Noether theorem for commutative and noetherian module algebras over a pointed Hopf algebra	58
Andrzej Tyc and Piotr Wiśniewski	
Constants of coordinate differential calculi defined by Yang–Baxter operators	96
V.K. Kharchenko	
Characters of the Borel and Sylow subgroups of classical groups	130
Balázs Szegedy	
The minimal components of the Mayr–Meyer ideals	137
Irena Swanson	
Pseudo Cohen–Macaulay and pseudo generalized Cohen–Macaulay modules	156
Nguyen Tu Cuong and Le Thanh Nhan	
Quantum super spheres and their transformation groups, representations, and little t-Jacobi polynomials	178
Yi Ming Zou	
Simple vertex operator algebras are nondegenerate	199
Haisheng Li	
A tensor product theorem related to perfect crystals	212
Masato Okado, Anne Schilling, and Mark Shimozono	
On equations defining Coincident Root loci	246
Jaydeep V. Chipalkatti	
Vertex operator algebra with two Miyamoto involutions generating S_3	272
Shinya Sakuma and Hiroshi Yamauchi	
QED Hopf algebras on planar binary trees	298
Christian Brouder and Alessandra Frabetti	
On the quasi-heredity and the semi-simplicity of cellular algebras	323
Yongzhi Cao	
Representations of a k-algebra over the rational functions over k	342
Raymundo Bautista and Zhang Yingbo	
Injective modules and fp-injective modules over valuation rings	359
F. Couchot	

On graded Frobenius algebras	377
Takayoshi Wakamatsu	
Criteria for equality of radicals of ideals	396
Alexandre B. Tchernev	
Decomposition of tableaux annihilated by zero-dimensional ideals	404
David Fu, Mark Heiligman, and Cameron Wickham	
Fitting heights of odd-order groups with few character degrees	421
Jeffrey M. Riedl	
Classification des formes réelles presque compactes des algèbres de Kac–Moody affines	443
Hechmi Ben Messaoud and Guy Rousseau	
Semigroups of left quotients: existence, straightness and locality	514
Victoria Gould	
Structure of a new class of non-graded infinite-dimensional simple Lie algebras	542
Yucan Su	
Weakly E-unitary locally inverse semigroups	559
Bernd Billhardt and Mária B. Szendrei	
Semigroups with the ideal extension property	577
Xiaojiang Guo	
Semigroups with good and bad magnifiers	587
Marin Gutan and Andrzej Kisielewicz	
Regularity and K_0-group of quadric solvable polynomial algebras	608
Huishi Li	
The finite basis problem for quasivarieties and pseudovarieties generated by regular semigroups. I. Quasivarieties generated by regular semigroups	635
D.F. Cowan, N.R. Reilly, P.G. Trotter, and M.V. Volkov	
Uncancellative factorizations of Baer-local formations	654
Wenbin Guo and K.P. Shum	
Young diagrams and the image of the Kashiwara embedding for $\mathcal{U}_q(\widehat{\mathfrak{sl}}(n))$	673
Alejandra Premat	
Real vectors for linear groups and the $k(GV)$-problem	725
Udo Riese and Peter Schmid	
Hopf filtrations and Larson-type orders in Hopf algebras	756
Farahat S. Aly and Freddy Van Oystaeyen	
Author index for volume 267	773
